

Phani Sai Teja Jampani

Software Engineer → Aspiring Product Manager

Bangalore, India | tejajampani01@gmail.com | +91 73489 68996

[LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with three years of experience building and supporting MRI software platforms at Siemens Healthineers. Skilled at translating requirements into technical solutions, analyzing complex system behavior, and prioritizing issues based on customer impact while driving release readiness with development and QA teams. Strong foundation in software engineering, stakeholder collaboration, and problem-solving, now seeking to transition into Product Management roles that combine technical depth with customer-focused product development.

EXPERIENCE

Software Engineer

Jul 2023 – Present

Siemens Healthineers — Bangalore, India

- **Designed and developed software components for MRI platform infrastructure**, including cybersecurity solutions, software update orchestration, and license-based feature enablement systems.
- Built backend services and multithreaded workflows in C# to support reliable operation across distributed MRI environments.
- Collaborated with architects, developers, testers, and domain experts to translate business and system requirements into scalable technical solutions.
- Defined requirement keys, clarified feature behavior, and partnered with QA teams to improve validation coverage and release quality.
- **Owned feature delivery across the full software development lifecycle** — design, implementation, integration testing, deployment, and production support.
- Investigated production issues using logs, telemetry, and debugging tools, enabling teams to prioritize fixes based on customer impact and operational risk.
- Coordinated with cross-functional teams during release cycles to ensure feature readiness and successful software deployments.
- Developed and maintained Azure DevOps CI/CD pipelines to automate testing and improve release reliability.
- Participated in Agile ceremonies including sprint planning, backlog refinement, estimation, and release discussions.

Technical Intern

Feb 2023 – Jun 2023

Siemens Healthineers — Bangalore, India

- Performed cybersecurity assessments and vulnerability analysis for healthcare software systems.
- Developed automation solutions to support security validation and software quality initiatives.
- Collaborated with engineering teams to identify risks and support secure software delivery.

PROJECTS

Full-Stack Agricultural Intelligence Platform — *AI for Bharat Hackathon, Top 100 Team*

2026

- Built a cloud-native post-harvest orchestration platform helping farmers make informed decisions across storage, transportation, and crop-sale stages.
- Designed and developed a full-stack web application hosted on AWS, providing end-to-end visibility into the post-harvest supply chain.
- Integrated AI-driven crop price prediction models to forecast market trends and support optimal selling decisions.
- Connected harvest planning, storage recommendations, logistics coordination, and market intelligence into a single unified workflow.
- Collaborated with a cross-functional team to define requirements, prioritize features, and ship a functional prototype within hackathon timelines.

ECG Pulse Wave Analysis for Cardiovascular Assessment — *IEEE Conference Paper*

2024

- Co-authored and presented research on non-invasive cardiovascular health assessment using pulse wave analysis and machine learning.
- Developed an approach to analyze wrist pulse characteristics — waveform shape, intensity, and frequency — to identify potential health conditions.
- Applied machine learning and pattern recognition to classify cardiovascular health indicators from portable sensing-device data.
- Published at IEEE IATMSI 2024, demonstrating the integration of traditional diagnostic concepts with AI-driven healthcare solutions.

Ultrasonic Spatial Mapper

- Developed a 2D spatial mapping system using ultrasonic sensors and microcontrollers, translating functional requirements into system design.
- Processed sensor data to detect obstacles and generate spatial representations of surrounding environments.

LEADERSHIP

Chairperson, UCSP Club — *The National Institute of Engineering*

Oct 2021 – Jun 2022

- Led cross-functional teams across technical, marketing, and editorial functions to organize flagship events including Codezilla, Git Workshops, and Web Development Workshops.
- Managed event planning, stakeholder coordination, budgeting, and execution for multiple technical initiatives, improving participation and operational efficiency.
- Introduced initiatives that strengthened the club's financial sustainability while significantly increasing student engagement and community participation.

CERTIFICATIONS & COURSES

- **AI-First Product Management Cohort, Airtibe** — 16-week intensive covering product strategy, user research, UX design, product analytics, PRD writing, go-to-market strategy, and AI-powered PM workflows.
- **The Joy of Computing using Python** — NPTEL (SWAYAM), Indian Institute of Technology Madras.

EDUCATION

B.E., Electronics & Communication Engineering

2019 – 2023

The National Institute of Engineering, Mysore CGPA: 8.34 / 10

SKILLS

Product Management: Product Strategy, Product Discovery, User Research, Requirements Gathering, PRD Writing, Feature Prioritization, Roadmapping, Product Analytics, Competitive Analysis, Go-To-Market Strategy, Release Coordination, SDLC

Programming: Python, C#, Java, JavaScript, TypeScript

Technical: Backend Development, REST APIs, Multithreading, Distributed Systems, System Design, Full-Stack Development, System Integration

AI & Data: Predictive Analytics, Machine Learning Fundamentals, Data Analysis, Feature Engineering

Cloud & DevOps: AWS, Azure DevOps, CI/CD Pipelines, Git, YAML

Operations: Root Cause Analysis, Log Analysis, Production Troubleshooting, Telemetry Analysis

Domain: Healthcare Technology, Medical Software Systems, Cybersecurity

Languages: English, Hindi, Kannada, Telugu
